So great this semester! only thing is I wish we could do a more active standing warmup or even just more strength-focused floor before getting into the deep stretches we start with - esp first thing in the morning - or vary it some days to start standing vs sitting. when I'm cold it's not too beneficial

7. Would you take a class from this professor again? Yes / no

8. Give comments and/or suggestions for the class and instructor.

Thank you for providing us w/ an efficient, consistent and strengthening warm up. I like the moments in class where we would work through movement in metaphors and with verbal instruction before given demonstrations - these are fun and challenging moments. It is also really enjoyable when we learn combinations across the floor patterns when you use layering as a method.

9. Additional Comments:
I wish there were more times when we experimented with different music like we had in previous semesters. These were always fun bonding moments for the class. Especially earlier in the semester, there were times when my peers had either questions or concerns that were not always met with the kindest or most understanding responses.
